RESEARCH

2004 -2005

Clinical Research

Kaiser Permanente San Diego

Performed a retrospective study to compare the effectiveness of traditional distal patellofemoral realignment to that of MPFL repair in patellofemoral instability.

2003 -2004

Clinical Research

University of Southern California

Performed a retrospective study to determine the epidemiology and microbiology of osteomyelitis in HIV infected patients.

2001 -2002

Clinical Research

Childrens Hospital of Los Angeles.

Performed a retrospective study to determine if surgical delay greater than 12 hours is associated with an increased risk of needing an open reduction or developing peri-operative complications in the operative treatment of supracondylar humerus fractures in children.

1998 -1999

Clinical Research

Northwestern University Medical School.

Performed a retrospective radiographic study on total hip arthroplasties to determine the degree of restoration of femoral offsets and neck shaft angles.

Summer, 1996

Research Assistant

Texas Health Science Center, Fort Worth, TX.

Elucidated the role of the Arrestin gene by transfecting photoreceptors which lead to down modulation of Bcl-2 and induction of apoptosis.
